PROFESSIONAL SUMMARY

Highly motivated and enthusiastic **Data Science** student with a strong passion for analyzing data and building intelligent, data-driven solutions. Dedicated to continuous learning and improvement, with a disciplined work ethic and a problem-solving mindset. Committed to delivering high-quality, scalable, and **interpretable models** while staying updated with the latest tools, technologies, and best practices in data science

EDUCATION

Alva’s Institute of Engineering and Technology, Moodbidre Bachelor of Engineering, Computer Science	2023–2027 <i>cgpa – 7.8</i>
Alva’s PU College, Moodbidre PCMB – 87.5%	2021–2023
R.N.S Vidyaniketan School, Hubballi 92%	2021

TECHNICAL SKILLS

Programming Languages: C, Python(intermediate)
Frontend Development: HTML5, CSS3
Backend Development: Node.js
Databases: MySQL, MongoDB
UI/UX Design: Canva
Operating Systems: Linux, Windows
Tools: VS Code, Eclipse, Git, GitHub, MySQL Workbench, MongoDB Compass
Others: Computer Networks

PROJECTS

Embedded Object Classification System | *Python, TensorFlow, NVIDIA Jetson Nano* | *Feb 2025*

- Designed and implemented an object classification model optimized for performance on embedded AI hardware (NVIDIA Jetson Nano).
- Fine-tuned model inference and hardware utilization to achieve efficient real-time object detection.
- Enhanced scalability and maintainability through modular code and on-device deployment strategies.

Weather Forecasting Web Application | *Flask, OpenWeather API, Chart.js, HTML/CSS* | *August 2025*

- Developed a dynamic web application for real-time weather forecasting and environmental insights.
- Integrated external APIs for live data retrieval and implemented interactive visualizations using Chart.js.
- Focused on intuitive UI/UX and responsive design for accessibility across devices.

Health Risk Management System | *Python, Scikit-learn, Pandas, Flask* | *Ongoing (2025)*

- Leading the development of a predictive health risk management system to identify and mitigate potential health-related risks.
- Implementing machine learning algorithms for risk prediction and data-driven decision support.
- Building an interactive dashboard for visualization and report generation to assist healthcare professionals.

ACHIEVEMENTS & CERTIFICATIONS

Hackathons & Events

- HackVerse Hackathon, Dayananda Sagar College – Participant**
- Technovate Hackathon, Alva’s Engineering College – Participant**
- Open Source India 2025, Bengaluru – Attendee**

EXTRACURRICULAR ACTIVITIES

A Day with the Future — AI & Data Science Workshop, Alva’s Institute of Engineering and Technology (Oct 26–27, 2025)

- Coordinated and led sessions for BHARAT Scouts and Guides on **AI concepts, prompt engineering, and NVIDIA Jetson platforms**.
- Conducted **hands-on robotics and chatbot-building** activities to inspire innovation and practical learning.
